

## Habitat House

Since the last report, the Habitat house we are helping build for the Hoover family is nearing completion. If you drive by the site on Morning Dr., you will see the exterior of the house completed – roofing and siding complete, columns and railing on the front porch, storage shed complete. The inside is almost done too. Plumbing and electrical work has been roughed in, walls are insulated and sheet rock is up throughout the house. We will be doing interior trim work (doors, cabinets, etc.) and painting in December. Thanks to all who have helped with the project this fall. If you want to help with final clean-up, contact Dick Metzler at [dndmetz@bellsouth.net](mailto:dndmetz@bellsouth.net) or 704-365-6117. Watch the weekly church notes for information about a date to celebrate with Shilette Hoover and her family as they take ownership of their new home.

In a related event, Habitat of Charlotte recently honored several SAPC members for 20 years of service. Al Faires, Richard Foard, and Don Shuman received congratulations and framed pictures of Habitat houses from Executive Director Bert Green. They, along with Chuck Wheatley and Ken Brown, first volunteered 22 years ago as a “trim crew” and have been working ever since.

Congratulations to all these dedicated workers.
